CP Item Adder FAQ's

Do I have to download the Item Adder to use it?

Yes, if you want to add items to your [Club Penguin](#) account then you must download the item adder tool. This is because the Item Adder works by accessing your account through a unique access point. Other item adders that claim to be “no download” are usually scams or they will get your account banned. If thousands of CP players are adding items through the same access point, then the Club Penguin admins will eventually find out.

How often can I use the Club Penguin Item Adder?

Technically you can use the item adder as often as you want but we recommend only using a few times per day. If you add a hundred new items to your account in one hour then it's going to look suspicious to the Club Penguin admins.

I just created my Club Penguin account today, can I use the Item Adder on it?

We do NOT recommend using the item adder on brand new CP accounts. This is because most new players don't have many items at all. If the admins see a brand new account with lots of rare or exclusive items, you will probably get banned. We only recommend using the item adder on Club Penguin accounts that are over a month old.

Why can't I find the download link for the Item Adder on your website?

Sometimes we have to take down the Item Adder tool for maintenance to make sure that it's working properly. If you don't see the download link, then try checking back later when the tool is available.
